

CNC MACHINING

510-HOUR, NON-CREDIT CERTIFICATE PROGRAM

Learn how you can have a rewarding career as a
CNC Machinist, Technician, or Programmer!

Classes start Monday, November 30, 2020

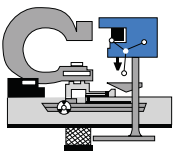

- This training includes theory and hands-on learning experiences for beginner-level students. Working in this field, you will build precision products and components used in a variety of applications: automotive, medical, electronics, aerospace, transportation, military, and more!
- You will use software to program CNC lathes and milling machines as well as learn how to set up and run them. In addition, you will learn how to set up and operate conventional lathes and milling machines.

• In addition, you will study applied mathematics, learn how to read blueprints, and take a tour of Don's Machine Shop to see CNC experts in action!

RESERVE YOUR SEAT TODAY!

- For more information, visit johnson.edu
- Registration is open until the course fills or November 30, 2020 at 12pm (Program fee is \$7,500).
- Classes will be held at 100 Elm Street in West Pittston, Pennsylvania.
- Contact our Continuing Education Department at 570.702.8979 to learn more or to enroll.
